Colin A. Ross quotes (showing 1-23 of 23)

“The major goal of the Cold War mind control programs was to create dissociative symptoms and disorders, including full multiple personality disorder. The Manchurian Candidate is fact, not fiction, and was created by the CIA in the 1950’s under BLUEBIRD and ARTICHOKE mind control programs. Experiments with LSD, sensory deprivation, electro-convulsive treatment, brain electrode implants and hypnosis were designed to create amnesia, depersonalization, changes in identity and altered states of consciousness. (p. iii)

“Denial of the reality of multiple personality by these doctors [See page 114 for names] in the mind control network, who are also on the FMSF [False Memory Syndrome Foundation] Scientific and Professional Advisory Board, could be disinformation. The disinformation could be amplified by attacks on specialists in multiple personality as CIA conspiracy lunatics” (P.10)

“If clinical multiple personality is buried and forgotten, then the Manchurian Candidate Programs will be safe from public scrutiny. (p.141)”

– Colin A. Ross, *Bluebird : Deliberate Creation of Multiple Personality by Psychiatrists*

“There have been extensive human rights violations by American psychiatrists over the last 70 years. These doctors were pad by the American taxpayer through CIA and military contracts. It is past time for these abuses to stop, it is past time for a reckoning, and it is past time for individual doctors to be held accountable.

The Manchurian Candidate Programs are of much more than "historical" interest. ARTICHOKE, BLUEBIRD, MKULTRA and MKSEARCH are precursors of mind control programs that are operational in the twenty first century. Human rights violations by psychiatrists must be ongoing in programs like COPPER GREEN, the interrogation program at Abu Ghraib prison in Iraq. Such programs must be carried out within CIA units like Task Force 121 (The Dallas Morning News, December 1, 2004, p. 1A). Information pointing to ongoing human rights violations by psychiatrists is available in publications like The New Yorker (see article by Seymour M. Hersh, May 24, 2004). Yes the indifference, silence, denial, and disinformation of organized medicine and psychiatry

“Dr. Louis Jolyon “Jolly” West was born in New York City on October 6, 1924. He died of cancer on January 2, 1999. Dr. West served in the U.S. Army during

World War II and received his M.D. from the University of Minnesota in 1948, prior to Air Force LSD and MKULTRA contracts carried out there.

He did his psychiatry residency from 1949 to 1952 at Cornell (an MKULTRA Institution and site of the MKULTRA cutout The Human Ecology Foundation). From 1948 to 1956 he was Chief, Psychiatry Service, 3700th USAF Hospital, Lackland Air Force Base, San Antonio, Texas Psychiatrist-in-Chief, University of Oklahoma Consultant in Psychiatry, Oklahoma City Veterans Administration Hospital Consultant in Psychiatry. Dr. West was co-editor of a book entitled Hallucinations, Behavior, Experience, and Theory[285]. One of the contributors to this book, Theodore Sarbin, Ph.D., is a member of the Scientific and Professional Advisory Board of the False Memory Syndrome Foundation (FMSF). Other members of the FMSF Board include Dr. Martin Orne, Dr. Margaret Singer, Dr. Richard Ofshe, Dr. Paul McHugh, Dr. David Dinges, Dr. Harold Lief, Emily Carota Orne, and Dr. Michael Persinger. The connections of these individuals to the mind control network are analyzed in this and the next two chapters. Dr. Sarbin[272] (see Ross, 1997) believes that multiple personality disorder is almost always a therapist-created artifact and does not exist as a naturally-occurring disorder, a view adhered to by Dr. McHugh[188], [189], Dr. Ofshe[213] and other members of the FMSF Board[191], [243].

Dr. Ofshe is a colleague and co-author of Dr. Singer[214], who is in turn a colleague and co-author of Dr. West[329]. Denial of the reality of multiple personality by these doctors in the mind control network, who are also on the FMSF Scientific and Professional Advisory Board, could be disinformation. The disinformation could be amplified by attacks on specialists in multiple personality as CIA conspiracy lunatics[3], [79], [191], [213].

The FMSF is the only organization in the world that has attacked the reality of multiple personality in an organized, systematic fashion. FMSF Professional and Advisory Board Members publish most of the articles and letters to editors of psychiatry journals hostile to multiple personality disorder.”

“The best way to deal with programming is to understand its function and meaning inside the patient, to deal with the underlying psychology, and not to address the programming directly in any technical sense. When the necessary work has been done, the programing loses its power and evaporates. Whenever I hear about a therapy in which special hand signals, accessing codes, elaborate hypnotic induction rituals, excessive dependence on ideomotor signals, voluntary restraints, or other extraordinary techniques are required, I always suspect that the therapy is counterproductive. This is no different from being suspicious about a general adult in-patient practice in which almost every patient gets a course of twenty electro-convulsive treatments: the problem is not with the electro-convulsive therapy as such, which can be a humane treatment method, but with its misapplication.

Like

Another problem with the deprogramming model is that it increases the disrespect of skeptical mental-health professionals for the dissociative-disorders field since there is no essential reason to adopt the term ‘programming’ because it carries no specific treatment meaning, even minor political costs of the term outweigh any possible benefits of retaining it. Many patients view their programming as literally and concretely a foreign entity inserted into their psyches, a cognitive error I attack through direct education and common sense.”

“Biological warfare (BW) and chemical warfare (CW) research was run out of Edgeware Arsenal but also involved testing in many other locations including Dugway Proving Ground, Utah. As in the radiation experiments described in an earlier chapter, BW/CW research involved releasing bacteria, fungi and viruses into general population areas. The bacterium *Serratia marascens* was released in many locations including New York (June 7–10, 1966), San Francisco (September, 1950), and Pennsylvania State Highway #16 westward for one mile from Benchmark #193 (January 7, 1955). Other infectious agents released into civilian

“The Tuskegee Syphilis Study is relevant to mind control in several ways. It establishes that a large network of doctors and organizations were willing to participate in, fund and condone grossly unethical medical experimentation into the 1970’s. This is the general setting for psychiatric participation in mind control and creation of the Manchurian Candidate.”

Dr. Michael Persinger [235], another FSMF Board Member, is the author of a paper entitled “Elicitation of 'Childhood Memories' in Hypnosis-Like Settings Is Associated With Complex Partial Epileptic-Like Signs For Women But Not for Men: the False Memory Syndrome.” In the paper *Perceptual and Motor Skills*, In the paper, Dr. Persinger writes: On the day of the experiment each subject (not more than two were tested per day) was asked to sit quietly in an acoustic chamber and was told that the procedure was an experiment in relaxation. The subject wore goggles and a modified motorcycle helmet through which 10-

milligauss (1 microTesla) magnetic fields were applied through the temporal plane. Except for a weak red (photographic developing) light, the room was dark. Dr. Persinger's research on the ability of magnetic fields to facilitate the creation of false memories and altered states of consciousness is apparently funded by the Defense Intelligence Agency through the project cryptonym SLEEPING BEAUTY. Freedom of Information Act requests concerning SLEEPING BEAUTY with a number of different intelligence agencies including the CIA and DEA has yielded denial that such a program exists. Certainly, such work would be of direct interest to BLUEBIRD, ARTICHOKE, MKULTRA and other non-lethal weapons programs. Schnabel [280] lists Dr. Persinger as an Interview Source in his book on remote viewing operations conducted under Stargate, Grill Flame and other cryptonyms at Fort Meade and on contract to the Stanford Research Institute. Schnabel states Schnabel states (p. 220) that, “As one of the Pentagon's top scientists, Vorona was privy to some of the strangest, most secret research projects ever conceived. Grill Flame was just one. Another was code-named Sleeping Beauty; it was a most secret research projects ever conceived. Grill Flame was just one. Another was code-named Sleeping Beauty; it was a Defense Department study of remote microwave mind-influencing techniques[...]

It appears from Schnabel's well-documented investigations that Sleeping Beauty is a real, but still classified mind control program. Schnabel [280] lists Dr. West as an Interview Source and says that West was a, “Member of medical oversight board for Science Applications International Corp. remote-viewing research in early 1990s.”

“The most chronic and complex of the dissociative disorders, multiple personality disorder, was renamed multiple personality disorder, was renamed 'dissociative identity disorder' in 1994 in DSM-IV (American Psychiatric Association). The rationale for the name change, was among other things, to clarify that there are not literally separate personalities in a person with dissociative identity disorder; 'personalities' was a historical term for the fragmented identity states that characterize the condition.”
