

Bush I declared the 1990s "The Decade of the Brain," an effort "to enhance public awareness of the benefits to be derived from brain research," keeping its dark side hidden.

The Pentagon's DARPA (Defense Advanced Research Projects Agency) conducted research and development in "augmented cognition," what universities call "cognitive science." It's the interdisciplinary study of how information is represented and transformed in the brain. The Pentagon's purpose was for military applications, including manipulating the emotions and behavior of adversaries.

Used globally, it's applicable individually, for crowd control, or larger groups, using millimeter waves, pulsed energy projectiles, and high power magnetic weapons, subjects unaware of what's hitting them.

The NSA's Signals Intelligence (SIGINT) involves decoding EMF waves to tap into computers wirelessly and track people. Using EMF Brain Stimulation to monitor individuals, organizations and nations, it complements the CIA/Defense Intelligence Agency's (DIA) Human Intelligence (HUMINT), and National Geospatial-Intelligence Agency's Imagery Intelligence (IMINT). NSA's DOMINT can track millions of people simultaneously. It can also inflict harm, control subjects psychologically and kill.

In conflict zones like Iraq and Afghanistan, "Project Sheriff" is used to give "troops working in urban terrain more options" against combatants and noncombatants alike. Humvees and armored personnel carriers have been retrofitted with non-lethal weapons, including microwave-like pain rays (an Active Denial System) and a Long Range Acoustic Device emitting earsplitting sounds.

Pulsed Energy Projectiles (PEPs) travel nearly at the speed of light. With pinpoint accuracy, they emit invisible laser pulses, electromagnetic radiation, stunning targets, knocking them off their feet, paralyzing them in pain. Their long-term effects, however, are unknown, including on the brain.

Voice to Skull directed acoustic devices are neuro-electromagnetic non-lethal weapons, able to produce mood-altering sounds in a person's head. Remote Neural Monitoring (RNM) uses satellite transmitted extra low frequencies (ELF) to send voice to brain communications. Long Range Acoustic Devices (LRADs) are used for crowd control. They produce 150-decibel acoustic beams, "designed to communicate with authority and exceptionally high intelligibility in a 15 - 30 degree beam." They emit verbal challenges over distances beyond 500 meters, with warning tones to influence behavior. They can also inflict physical harm, manipulate minds, and cause death.

The field of Augmented Cognition includes Transcranial Magnetic Stimulation (TMS), used therapeutically and for military purposes. The latter is to emit close proximity electrical impulses to the brain to affect mood, sleep patterns, and improve cognitive abilities in areas of learning, memory, attentiveness, visualization, and decision-making. The long-term neurological effects are unknown. The potential for human harm is considerable.

Transmitted over long distances, silent psychotronic weapons can cause illness or death for no apparent reason. In his 1970 book, "Between Two Ages," Zbigniew Brzezinski, discussed technologies to conduct secret warfare, saying:

"It is possible - and tempting - to exploit, for strategic-political purposes, the fruits of research on the brain and on human behavior....Accurately timed, artificially excited electronic strokes could lead to a pattern of oscillations that produce relatively high power levels over certain regions of the earth....In this way, one could

develop a system that would seriously impair the brain performance of a very large population in selected regions, over an extended period."

Most people know nothing about directed energy weapons, manipulating, incapacitating and killing many thousands who have no idea what hit them. America has been a longtime global offender, developing and using them for decades to surveille, harass, intimidate, manipulate, torture, and kill. They can also read minds and turn people into zombies. Why? To achieve total unchallengeable control.

So-called "non-lethal weapons" can be as harmful as killer ones. Ongoing research, in fact, is chilling. Waging war on human minds and bodies, it's morally, ethically, and legally indefensible. Continuing, however, atrocity technologies are produced, mostly without public knowledge or that governments like America use them against their own people and others. For ill, of course, not good. Dr. Mengele lives.

Stephen Lendman lives in Chicago and can be reached at [lendmanstephen@sbcglobal.net](mailto:lendmanstephen@sbcglobal.net). Also visit his blog site at [sjlendman.blogspot.com](http://sjlendman.blogspot.com) and listen to cutting-edge discussions with distinguished guests on the Progressive Radio News Hour on the Progressive Radio Network Thursdays at 10AM US Central time and Saturdays and Sundays at noon. All programs are archived for easy listening.
