Allen Barker's Mental Firewall: *"It basically asserts that if you act like Mengele then you are a Nazi pig. Then there are a few obvious conclusions that are also part of the "theorem." The Nazi Pig Theorem (NPT): Anyone who nonconsensually violates your brain/mind/mentation using Mengele-like methods is a Nazi pig. You do not care what a Nazi pig thinks. You do not care about a Nazi pig's opinions. You do not respond to a Nazi pig ridiculing you, threatening you, trying to distract you, or otherwise trying to manipulate you. You work to get a Nazi pig hanged."*

DEW – Direct Energy Weapon – are device used for OSEH (Organized Stalking Electronic Harassment) purposes, weapons can be microwave with pulp frequencies, v2k or other electronic and hearing devices.

WHAT ARE DEW WEAPONS?

- electronic devices used to cause sleep deprivation and malaise,
- a hit man's dream
- classified or unclassified electronic weapons developed by the federal government, military, or private corporations to *kill slowly*
- electronic devices used to tetanize muscles, cause strokes, heart attacks, or memory loss, instill fear, rage, or other forms of control over any living being
- electronic devices which can manipulate hormones
- patented or unpatented electronic devices developed to control behavior in living beings
- electronic weapons developed specifically to covertly manipulate the masses
- electronic weapons which, when used over the long term, cause a wide variety of illnesses, including lupus, fibromyalgia, multiple sclerosis, chronic fatigue, lymphatic breakdown, depressed immune system, low t-cell count, etc.

targets are true TIs, their phones WILL be tapped, their computers WILL be hacked, and their mail WILL be monitored. What can victims do to defend themselves, halt electronic stalking and mind control (ESMC) activities, apprehend the cowardly perverts who carry it out, and punish them and their accomplices?

Remember that the perpetrators of your ESMC are the criminals, not you. Certainly, the total loss of privacy, even in the case of your most intimate thoughts, is frustrating. That common criminals whom you probably do not know have knowledge of your thoughts that even family members and friends do not know is unnerving. However, keep in mind that whatever the criminals know about you and your thoughts, they cannot publish them in the New York Times. I continually laugh at my perverted handlers and tell them that I really don't care what they see, hear, know, or think that they know, or do. I tell them through our synthetic telepathy to publish those thoughts in the newspapers and expose them on national TV. It does not matter to me.

Remain positive. Despite the unsettling nature of the ESMC activities, targets must make a special effort to maintain a positive attitude, especially when around others. Remember that the perpetrators of ESMC are trying to ruin your lives. Do not let them. I start each day by stating to myself how great the day is, whether it is rainy or sunny or cold or hot.

Resist depression. One of the handlers' ploys is to cause a target to commit suicide. Keep your life bright. Surround yourself with uplifting and cheerful décor. Let plenty of light into your house. Targets have a tendency to keep their houses dark, with the windows perpetually covered. A dark house encourages depression. Open those windows. I do not even have curtains on my windows. And also use your good mind. Tell yourself how fortunate you are despite your electronic and mind control assault. Think about things that make you happy and that calm your mind.

Maintain your physical health. This is very important, as the perpetrators of the ESMC seek to make you a couch potato. They will whisper to your subconscious to binge eat, to watch more TV than usual, and to eat the wrong kinds of food. They will also whisper to you that you have no energy, that you feel extremely tired, and that you must rest.

Take vitamins and eat correct foods. Force yourself to get exercise and be active. They will discourage you from making improvements in and around your home. Despite your listless feelings, go about your activities and make a point of getting plenty of exercise. A clear correlation exists between physical health and mental health. Defy the handlers. Make a concentrated effort not only to maintain your health but even to strengthen it.

Be receptive to making new friends. Many targets have suffered so many frustrations and disappointments because of their ESMC that they have become suspicious of everybody. That appears to psychiatrists as paranoia. Moreover, that is exactly what your handlers want, as it further isolates you from society. Do NOT think that every person you meet is an accomplice of the handlers. There are still many uncorrupted people with whom you can become friends. However, remember that to have a friend, you must be a friend.

Do not engage private investigators. They are often a part of the problem. Private investigators cannot ply their trade without the assistance of law enforcement. First, they have to register and get permission to operate from a state law enforcement office, usually the attorney general. Then, they have to be tied into the state police and other law enforcement agencies' data systems to look up license numbers and auto license tags, search backgrounds, and even look for missing persons.

Moreover, many of the private investigators are shady characters who operate just inside the law, and they often even cross over that line. I believe that private investigators are part of the law enforcement network that probably participates in actual electronic stalking and mind control. Getting private investigators to look for a bug in your car is like sending the fox to the hen house. Even if they discover a bug, they will not inform you, for they would believe that it was placed there by law enforcement. In fact, they will have probably already been informed by law enforcement of the bug.

Do not discuss your ESMC harassment with every friend, family member, and acquaintance. They simply do not understand and cannot understand. However, if you have a perceptive, intelligent, trusted friend or family member who is open minded enough to believe hard-to-believe circumstances, let that person know what is happening. A confidant who truly believes you can be very supportive.

Do NOT visit a psychiatrist. The ESMC assailants want targets to go to psychiatrists, knowing that the doctors will diagnose targets as schizophrenic or paranoid. Once targets see a psychiatrist, their credibility is compromised.

The evil perverted assailants will do everything to convince targets that they are mentally incompetent, including continually whispering to their subconscious "you are crazy." Indeed, the handlers' activities will often cause targets to exhibit the very symptoms that psychiatrists associate with schizophrenic and paranoia in attempting to defend themselves against forces that they cannot see and do not understand. However, the general public is increasingly becoming aware of ESMC, and friends and family members of targets who have been designated "demented" are beginning to see that those targets are not truly mentally unstable. In only a few more years, the psychiatric community will have to redefine schizophrenia, paranoia, and other mental disorders because of the unnatural

LATEST COMMENTS

Georgia Yankee Disgustingly long, but names of offices held by the offenders and dates would be helpful. And the list is a year out of date -- I'm sure updating it might double its length . . .

Lyle Courtsal Omigawd, watch out; the psychobabblers were "helping" this guy into the grave by invalidating his perceptions of his situation without any evidence. This would happen all the time in both the nazi and soviet totalitarian manifestations. Psychology has been used to oppress and persecute people for decades even in the US, Britain, and Canada.

Linda Joy Adams I linked this to my sites and added some to it. I am in a life threatening situation do to clients of public SEC Records. But since 2002 government contractors have no funding from Congress for civil nor criminal over sight. and no law enforcement can do anything and neither can the SEC which was also defunded. The SEC has only been able to investigate part of a cabal of shell companies that have near total control of the government at all levels now that ARE NOT GOVERNMENT CONTRACTOR. ITS WHAT IS WRONG WITH HEALTH CARE as no government is in control and no way to stop real well documented crimes either. ITS NOT THE PLAN ITS NO GOVERNMENT IN CHARGE AT ALL. And a subsidiary of Goldman-Sach's is whom you report fraud to at HHS and your health insurer has to hire the also is what I have found to be and many seem to get financing from Blackstone per public, online SEC filings.et al.. Linda Joy Adams

Lyle Courtsal Tell that bit about 911 being a hoax to the NYFD and the 300,000 poisoned by the dust, idiot nazis in lala land.

Kaanii Powell Cleaver Thank you for sharing my article! This is important stuff that most Americans don't know, but should. --kpc

Michael Actually, Leary was innocent of intent to work as an MKUltra researcher. That cannot be said about Alan Ginsburg and Richard Alpert, his associates. Leary was surrounded by spooks from the start, but was a true believer that L.S.D. was the wave of the future. The spys at the C.I.A., being paranoid murderers, had bad trips when they put the substance in each others coffee cups as a joke at Langley. Their intent was to redirect the left's emphasis towards introspective navel gazing and away from immediate revolt. What they did not realize, however, is that L.S.D. in the brain of a normal person can actually galvanize revolt, albeit in a different sphere of consciousness. A prisoner in the same cell as Leary in Lexington, KY reported that Leary at one point returned to the cell with his head shaved and blue locational lines drawn across his skull. This was used to precisely interface two radiation beams that intersected at the desired point of brain

electronic and mind control assaults that cause those symptoms. This will not occur, however, without a great deal of pressure from the outside, as psychiatrists have no way of treating remote-induced symptoms of schizophrenia and paranoia resulting from ESMC.

Resist any effort on the part of law enforcement to make you submit to a psychiatric

evaluation. In our system of justice, targets should not have to prove that they are sane. Indeed, the burden of proof falls on law enforcement to prove that targets are mentally deranged. That is why authorities want to send you to a psychiatrist whom they customarily use and can depend on to render a verdict that is in keeping with their accusations.

Know that mental incompetence cannot be proved by your words and actions alone, and that the state and local law enforcement have no power to act unless your actions have the potential of harming yourself and others. If authorities do insist on your seeing a shrink, demand that the psychiatrist also possess knowledge of directed energy, electrical and radio theory, high tech communications, organized stalking, and even electronic stalking and mind control. That will, of course, limit the possibilities to only a few psychiatrists. Notwithstanding, targets should make every effort NOT to look insane by falling into the handlers' well laid traps. Despite your frustrations and the handlers' drivel through V2K, ***do not act irrationally.***

De-emphasize "self." Many targets become obsessed with what the handlers do to their minds and bodies. That is quite natural and understandable. However, targets should train their minds to think beyond themselves and instead reach out to their pastimes, hobbies, and to others. Reducing their attention to "self" is a very important defense tool for targets.

Make special efforts to stay in contact with family members and friends, for the handlers

concentrate on isolating you from society. Maintaining contact will not be easy. The handlers will fill your minds with negative thoughts about those people. Moreover, the handlers will have hacked your computer and tapped your phone lines. I recently got a call on my cell phone that showed the phone number of good friends, a man and woman couple. The person who called pretended to be the woman; however, the female speaker spoke with an accent and the voice was most certainly not that of my friend. Moreover, she ended with an exaggerated "good-byeeeeeee," which would have been totally out of character for my friend. That meant that the caller had used my friends' telephone service provider to be able to make the call through my friends' account; otherwise, the real number of the impostor would have appeared on my phone. The caller probably wanted me to say something later to my friends about the call to make me appear crazy. I did not mention the call to them.

The handlers will cause problems with your computer and will intercept your emails to others

and also those that come from others. They will also suddenly cut off phone conversations, create static that makes talking impossible, cause your voice to echo (only you will be able to hear those echoes), and sometimes divert the calls so that their accomplices answer. Manipulation of your communications system is ultra important to the perverts' plan to isolate and frustrate you.

Record the handlers' actions and your thoughts about them. Those thoughts will change over time as you learn increasingly more about your handlers. Their ESMC tactics will also change, becoming increasingly more complex as they go through their repertory of capabilities. It is very important for you to describe the perverts' electronic and mind control actions accurately and to record in great detail the sensations that you feel and your reactions to those actions. Record the day, date, and hour that particular actions occur. You may see a pattern in the timing. Their actions will normally occur in the evening while you sleep, as you present an immobile target for them and there is less electromagnetic atmospheric interference. Keep a flashlight, watch, notepad, and pen underneath your pillow or nearby to record those actions.

Be observant. The handlers, of course, count on your not having proof of their electronic stalk and mind control activities. Watch people, places, and objects carefully. Record your reactions when you see anything that looks even slightly odd. Videotape anything that happens out of the ordinary: blinking lights, anomalies in your emails, etc. Record any unusual sounds: loud noises that occur in or around the house, etc. However, do not let yourself develop paranoia over those events.

Remember precedents. Think back over previous events and actions. You had to have been targeted at some point in time. By recalling people, occasions, and incidents, you will probably get a very good idea about when, by whom, and even how you were targeted. Particularly think about any medical procedures, shots, and inoculations that you had prior to your electronic stalking and mind control experiences.

Thwart the efforts of the handlers and defy them. As time goes on, you will see that certain actions on your part affect the capabilities of the handlers. You will also learn things that annoy the handlers. I enjoy singing monotonous ditties and repeating a phrase or a sentence for hours at a time (silently, through thought) as I work and putter. Laugh at your handlers and try to make their lives as miserable and difficult as they attempt to make yours. Remember that behind the ESMC lie humans (I call them sub-humans). As vile, evil, and hard as they might be, those humans can be affected by your thoughts against them.

Stay alert. The handlers will attempt to make you do irrational things by whispering instructions and suggestions

destruction. This would not be done to one who had been an asset to the powers that be. After that, Leary spoke only about such nonsense like us all relocating to orbiting cylinders in outer space. Don't forget that L.S.D. was the central sacrament in both the Greek and Roman religions, and the partaking of it was considered to be an honor only offered to the finest citizens like Socrates and Plato. Socrates was ordered to commit suicide for the crime of "profaning the Mysteries". This was because he brewed up his own batch at his villa in the country and gave it to his students, explaining that there was no mystery, it was a drug. Leary was a hero, and had his keen mind taken for what he sincerely believed.

into your brains. Know this. Give much thought to your actions because of that. Remember that one of the major objectives of the handlers is to make you look crazy. Be very careful of their deception.

Work to change the narrow mindset of the medical community about ESMC. I am quite certain that at least some psychiatrists recognize the reality of ESMC without admitting it.

Submit written complaints to local law enforcement. Get the complete name of the officer to whom you submit your report. It is very important that the reports be presented in writing so that YOU can word the complaint like you wish. Otherwise, the person with whom you are talking will write it the way he wants to, probably noting that you are nuts. Ask the officer to whom you submit your complaint to sign it. Others have done this and the officers have refused. If the officer refuses to sign, record that in your notes and let him see you doing it. Your complaints will probably never be entered by law enforcement in their crime statistics. Mine were not and neither were those of other targets with whom I have corresponded. Law enforcement wants no record of your complaints about ESMC.

Contact your Representatives and Senators in writing. Petitions are meaningless. Write individual letters. It is important that your correspondence be done in writing (emails or letters), as their employees may include an accomplice “plant” who will not record and advise higher-up authorities of telephone calls. This will of course reveal your real name. It is time for victims to stop hiding and let the public know what is actually going on in this country. Our reluctance to do so has allowed electronic torture and mind control to go unchallenged probably for decades.

In addition, send copies of your letters to local and state officials, particularly the sheriff’s office and the attorney general’s office. Do not expect answers or acknowledgements of receipt. Unless overwhelming pressure is laid on the backs of leadership, nothing will be done. Congresspersons, themselves being protected, are probably blithely unaware of electronic stalking and mind control and the possibility of national and local law enforcement in that activity. However, they cannot ignore thousands of letters of complaint. There is strength in numbers, and the number of victims is growing every day.

Seek out other victims of ESMC and network with those victims in comparing your symptoms, your thoughts, and information that you have found on ESMC. That organization can also become a meaningful support system for you. In the United States, Derrick C. Robinson, a TI and also a U. S. Armed Forces veteran, heads a pro-active organization called Freedom from Covert Harassment and Surveillance (FFCHS) whose address is info@freedomfchs.com. There are other similar organizations worth joining.

Maintain the life style that is normal to you to the extent possible. Targets often let their targeting become their way of life. They relocate from place to place. They continually look for and experiment with shielding. They spend every waking moment on the computer communicating with other targets and writing to forums, phoning other targets, and thinking about their particular problem. They come to believe that every person and every action somehow relates to their targeting. When targets’ allow their situations to consume their total time, they sacrifice family and friend relationships, give up their hobbies and pastimes, and often neglect their appearance and their health. Indeed, no target asks for the electronic stalking and mind control activities that he receives. Yet, targets must try to balance their life to include activities other than those related to ESMC. Remember that every person with whom you are in contact is not a perp. There are still wonderful people out there.

Do not consider suicide an option. Your handlers, through sleep deprivation, electronic torture, mind control, social

isolation, and other ways will attempt to make you take your own life. That is a part of the script. Do not oblige them. The FFCHS has recently begun collecting notarized statements from members who swear that they will never take their own lives. We call it a No-Suicide-Ever pact. This was considered necessary because some targets die under very mysterious circumstances that are recorded as suicides. Many targets are certain that some of those suicides are murders staged to look like suicide.

Do NOT allow the handlers to force you to move. They will often try to force targets to leave their houses and even their hometowns. I have never known a target who improved his situation by moving. Targets who do move will normally end up drifting from location to location, getting out of touch with friends and relatives along the way, and ending up alone in shelters or on the street.

Defying the handlers – I am very defiant of the handlers, and I go on with my life despite their electronic and mind control effects and the resulting annoyances and inconveniences. The handlers recognize that although they can bother me, they cannot beat me down. On two occasions, the handlers have invited me to join them. I laughed, called them a few choice names, and told them, “Not in 500,000,000 years!!!!” Whether their offers are real or more deception, the handlers know that I will NEVER sell out to them.

Over the last few months, the handlers have focused some feature of their device on the outside of my right nostril. I can feel a distinct tingling in that location that is anything but natural. First a very sensitive brown spot appeared there and then a small indentation. More recently, I have noticed a white spot about a quarter of an inch in diameter on my chin, where the tingling also occurs. Like my nose and ears, that spot becomes covered with a film, except that instead of feeling crusty, it feels soft. The hairs of my beard are thicker and much more numerous in that small area. The handlers may be trying to cause skin cancer or melanoma. The handlers know that I use smokeless tobacco, and they want the cancer to appear to be tobacco-related.

I visited a Monroe dermatologist in the summer of 2009 to have a record of that induced malady. The doctor did biopsies on the two spots and found the one on my nostril cancerous. He wanted to set up an appointment with a plastic surgeon to remove the cancerous growth, and he was dismayed when I told him that I would not seek nor accept treatment. I candidly explained that the spot was induced and that the attackers could and probably would only cause additional places. I gave him a copy of this same paper to read. I do not know whether he read it or not.

Electronic torture and mind control have been employed for decades. Why have they not been curtailed? Here is why:

(1) Targets have suffered in silence. Only with the advent of the internet have targets begun to perform research and reach out to other victims. Most of that communication has transpired during the last ten years or less. The internet is the last bastion of communication freedom. The powerbrokers have not yet contrived a way to limit and control its use.

(2) Targets have wasted too much time in complaining to each other and have gotten bogged down in self-pity. That does not at all mean that we should stop supporting and communicating with each other; yet, that should not be an end in itself. Targets should become activists instead of habitual complainers.

(3) Targets have depended on law enforcement, national government, and international bodies to “investigate” and stop the electronic torture and mind control. They are correct in doing so; however, only those agencies of the government that are most likely to engage in ESMC or aid the perpetrators or allow them free rein in operating have the necessary expertise to “investigate.”

(4) Targets have remained anonymous. Most targets are reluctant to use their real names for fear that it will alienate family members and friends and make the targets appear crazy. I first wrote this paper under a pseudonym. However, when I realized that that did not serve the interest of the targeted community, I changed the name of the author to my real name. **(Source:** The Silent Massacre Electronic Stalking And Mind Control in the United States of America by Max H. How surveillance technology really works is unknown to 99% of the population. Read this article to find out:
<http://bit.ly/1DAsFQD>

Julie Hope

February 18th, 2015

I am currently a victim of this new trend called electronic torture. I need help. My own investigating seems not to be enough. It’s cost me my job, thousands in medical bills and damage to my relationship with my family. Verbally asking for it to stop has not been enough. I need help! They have hacked my computer, my cell phone. Harassed me on errands and at Drs appointments and illegally infiltrated my home.

Lyle Courtsal

March 31st, 2015

Also remember the difference between bullet cover and visual cover; that which will stop a bullet vs. just make it hard to aim at you. I had a Seattle police officer say “my .40 will go through that vest” one day; an implied death threat. I’m not feeling the love, occifer.

ken vawter

June 23rd, 2015

Ive been tortured for nearly three years now. Electronic torture. Ive written letters, contacted fbi, and even filed a ridiculous lawsuit. Im being balded right now...burning sensations under my scalp. I was in school going into the fire department and i began noticing changes around me. Began with rnm monitors above my home. Cyber technology entering my home. Feelings of addiction, crazy dreams, stinging sensations in.my eyes. Many more injuries. The pain is unbearable. I have dealt.with a frequency that bypasss my ears thats connected to my auditory cortex for the last two years. In other words hearing voices. Which is sophisticated technology which sounds just like real people. My life will never be the same.

Tony Major

July 9th, 2015

Refreshing advice to see....

I am and have been a victim for a long period of time. The advice above is sound.

There are some interesting caviots to the remedy provided in this documend and I am not certain that it would be adhered upon first read.

The victim will not understand that they are not going to be able to convince anyone of it's reality and that those closest to them are also being effected.

The bad news: Only you are dealing with this torture. Yes, others closest to you are also being manipulated – persuaded that YOU are the cause. They have been studied too and while not as apparent as your own symptoms they are hearing inaudible voices and their tempers raised electronically – angry and they don't know why!

In my case, there were three distinct voices among the many. One of them chose to target my son... He explained a situation where they followed him to school... right behind him, over the back yard fence, in the corner of his classroom. He asked me "Dad, is it the devil if you hear someone talking to you but there is nobody there?" I described the distinct voices and he resoundingly picked one of the three.

I had found the advice explained above – from a different source but began to put it into my life. "Oh shit!" is all I could say to myself and I made the decision to move my family as close to her side of the family as possible and leave.

Why? – Away from them I can no longer be the target for their influenced attacks. I am going to say that a different way. My CHILDREN were being influenced to hate their father for reasons put in place by my reactions to this onslaught.

What am I today? – Ok, now I am going to appeal to those who have put all of thei pieces together.

We know the attack is real. We know of the synchronized delivery of physical (cranial introduction) PAIN with emotional sway and sometimes imagery ... but mostly a mix of first – squandered thoughts – like "how am i going to pay that bill?" ... mixed wih Anxiety ... mixed with pulsed headache ... sometimes in different order.

While this looks innocent enough...

Today I have no money problems... there is an answer to all my anxieties... and I am very well exercised putting me in good health.

The pulsed pains are delivered in that way to prepare you for next level of pain – delivered slowly and focused ... and THEN you go get MORE medical attention.. hypochondriach.....

... then you remember the principals above.

I live
I put my energy into positive
I have no anxieties.
I endure as a soldier away from family
I ENJOY the freedom of living personally with voices and stopped trying to convince anyone.

I have new friends and relationships who – yes – are sometimes influenced BUT because of the above.... they return AFTER they realize they made a mistake... (when actually it was a bad thought deposited.).... but I walked away when I saw and before it grew to more.

Help is available but to pierce the construct of a fellow TIs attack requires their exhaustion and loss. Try to visualize your own mentallity after you have answered sufficiently all the questions that are being "pushed" into your head.

Write them down...

Then begin to answer to them.. they are real... at first... even miniscule and minute... they exist to an extent .. but once satisfied leave you with just YOU... and "the voices".

13 yearsand it started horribly.. today... Its like looking at the ocean... and jumping in ... anywhere..... because I know what I know.

The American Reinvestment and Recovery Act and the brain initiative are the worst scams ever perpetrated on the American people. Former U. S. Surgeon General Regina Benjamin Warns: Biochips Hazardous to Your Health: Warning, biochips may cause behavioral changes and high suicide rates. State Attorney Generals are to revoke the licenses of doctors and dentists that implant chips in patients. Chip used illegally for GPS, tracking, organized crime, communication and torture. Virginia state police have been implanting citizens without their knowledge and consent for years and they are dying! Check out William and Mary's site to see the torture enabled by the biochip and the Active Denial System. See Terrorism and Mental Health by Amin Gadit or A Note on Ueberveillance by MG & Katina Michael or Safeguards in a World of Ambient Intelligence by Springer or Mind Control, Microchip Implants and Cybernetics. Check out the audio spotlight by Holosonics. The truth is the biochip works like a sim card. It received pulsed modulated laser beams and millimeter wave which it converts into electromagnetic waves that your brain interprets into digital images and sound. It then takes what your brain sees and hears and converts electromagnetic waves into digital and acoustic waves that a computer translates into audio and video. In other words, it allows law enforcement to see what you see, hear what you hear and communicate directly with your brain.

“Former Defense Advanced Research Projects Agency (DARPA) director and now Google Executive, Regina E. Dugan, has unveiled a super small, ingestible microchip that we can all be expected to swallow by 2017. “A means of authentication,” she calls it, also called an electronic tattoo, which takes NSA spying to whole new levels. She talks of the ‘mechanical mismatch problem between machines and humans,’ and specifically targets 10 – 20 year olds in her rant about the wonderful qualities of this new technology that can stretch in the human body and still be functional. Hailed as a ‘critical shift for research and medicine,’ these biochips would not only allow full access to insurance companies and government agencies to our pharmaceutical med-taking compliancy (or lack thereof), but also a host of other aspects of our lives which are truly none of their business, and certainly an extension of the removal of our freedoms and rights.” Google News

The ARRA authorizes payments to the states in an effort to encourage Medicaid Providers to adopt and use “certified EHR technology” aka biochips. ARRA will match Medicaid \$5 for every \$1 a state provides. Hospitals are paid \$2 million to create “crisis stabilization wards” (Gitmo’s) where state police torture people – even unto death. They stopped my heart 90 times in 6 hours. Virginia Beach EMT’s were called to the scene.

Mary E. Schloendorff, v. The Society of New York Hospital 105 N. E. 92, 93 (N. Y. 1914) Justice Cardozo states, “every human being of adult years and sound mind has a right to determine what shall be done with his own body; and a surgeon who performs an operation without his patient’s consent, commits an assault, for which he is liable in damages. (Pratt v Davis, 224 Ill. 300; Mohr v Williams, 95 Minn. 261.)

This case precedent requires police to falsely arrest you or kidnap you and call you a mental health patient in order to force the implant on you. You can also be forced to have a biochip if you have an infectious disease – like Eboli or Aids. Coalition of Justice vs the City of Hampton, VA settled a case out of court for \$500,000 and removal of the biochip. Torture is punishable by \$1,000 per day up to \$2 million; Medical battery is worth \$2.05 million.

They told my family it was the brain initiative. I checked with the oversight board, and it is not! Mark Warner told me it was research with the Active Denial System by the College of William and Mary, the USAF, and state and local law enforcement. It is called IBEX and it is excruciating.

they been burnin me for yearsmaking me have severe cramps the lights buzzing ears 24-7

Jessica Charpentier

January 7th, 2016

I was hypnotized every day/night for 4 months. Electronically tortured with “pulses” that felt like I was being whipped. I’ve had “simulated” gang rapes, felt like I had 2 or 3 football players on top of me. Very painful. Energy simulators of some sort were involved, making me “be” a different person every 5 minutes.

I get disturbing images put in my mind, I hear them talking to each other (two “teams” rival against each other to see who can get me to say or do something, and if I “lose” I get a physical alteration to my body (like a chin hair, a bigger nose, saggier breasts, a line on my face, wider hips, etc.)

I was “told” this is the CIA and the Military. My family does NOT understand. I have been labeled with every type of mental illness you can imagine.

I need help!! (508) 524-6218 is my phone #. Someone who can help stop please call or text me or something. I’m desperate.

Natasha Roberts

January 20th, 2016

Hi, I don’t know how to get help and the right person to talk to. I have studied brainwashing in the past before, but unable to stop something horrible happening to me. No one will believe me. One nite I lost everything due to my abuser finding after 15 years and she was working with some kind of company to chip and alter my mind to ensure the sale of book, show, movie. They wanted to ensure that I would be changed into a whore, animal violater, stripper, and mentally challenged person, through a chip that was administered against my will and without written person. It was all fraud they tried to turn me into a monster just because I left my abuser 15 Years ago.(Sharon Miller of Middletown, DE, she is not from Tucson, AZ). Kristina, Age 17 does not exist its all fraud.

My legal name is Natasha Kerry Roberts, Age 36.

They stole my identity in Tucson, AZ and have been following me from Tucson, AZ to Las Vegas, NV. Do you have any information on a company known as Institudol.

Constant chatter from all parties involved 24/7, with projections of people coming to violate me, but they are not really there.

Caused several heart attacks, seizures, abdominal pain. There was also a forced pregnancy, they knew I lost it because they have been video recording me since august without my permission. I had never been preganant before and thought I lost it tucson. Violated my human rights and laughed at me while I was having medical traumas induced by them. I could not seek medical attention because they had controlled the situation when I went to the er in tucson, az for the seizures I suddenly had seen one of there associates that was employed by institudol I believe. They have some hackers that use these phones that make a snake noise. They had hacked my internet, smart phone and even my tv. They have control of my life but I hide and lock my door and pray every nite that they will show mercy and stop. The police in Arizona assisted the Company and Sharon Miller, but I can’t specify the cities due to safety concerns. I wrote to the FBI to try to get help, but no answer.
